

Informatics B001: Introduction to Technology

Catalogue Number	3167-0000
Category	Informatics
Prerequisite Course	None required

Lesson 2: Technology and Other Disciplines - Objectives

After completing this lesson, you will be able to:

- Discuss the influences of technology on various disciplines.
- Identify different technologies that influenced the fields of agriculture, education, medicine, entertainment, construction, and retail.
- Discuss the types of problems that new technologies try to solve for each of the various disciplines.
- List objects and events that could not exist without modern technology.
